

# Quantum

## WHO

4 Faculty

Jon Barrett

Aleks Kissinger

Matty Hoban

Sergii Strelchuk

- + 1 URF Fellow  
*Sathya Subramanian*
- 5 postdocs
- 11 PhD

# Quantum

## WHAT

Jonathan Barrett	<ul style="list-style-type: none"><li>Quantum information theory</li><li>Foundations of quantum theory</li><li>Causality and quantum causal structures</li></ul>	Aleks Kissinger	<ul style="list-style-type: none"><li>Quantum compilation</li><li>Fault-tolerant quantum computing</li><li>Classical simulation and verification of QC</li><li>(Quantum) causal inference</li></ul>
Matty Hoban	<ul style="list-style-type: none"><li>Quantum information and foundations</li><li>Quantum non-locality</li><li>Quantum verification and device-independence</li></ul>	Sergii Strelchuk	<ul style="list-style-type: none"><li>Quantum algorithms and applications (esp. bioinformatics)</li><li>Classical simulation for QC</li><li>Quantum complexity theory, and quantum learning theory.</li></ul>

- ERC/UKRI DeQS project + EPSRC RoarQ
- Wellcome Leap Q4Bio challenge
- Quantum Software Alliance
- Quantum Informatics CDT
- participation in MQTech masters & Oxford Quantum Institute
- open-source quantum compiler development
- Industrial collaborations with Quantinuum, IBM, Cleveland, Foxconn, IONQ, ...
- ...

European Research Council  
Established by the European Commission

# Quantum

## WHERE

...Research challenges

### *Foundational*

*Quantum foundations & quantum causal structures*

**Q:** What can quantum computing tell us about fundamental physics?

*Quantum complexity theory & q. advantage*

**Q:** What kinds of tasks are easy, hard, or impossible with classical or quantum computers?

### *Practical*

*Fault-tolerant quantum computing*

**Q:** How do we scale up quantum computers and make them robust to noise?

*Quantum algorithms for chemistry & genomics*

**Q:** What are the most important applications for quantum computing in the future?

*AI for Quantum*

**Q:** Can AI help us overcome difficult problems in design of quantum hardware and software?
